

- 1) Used the YGO Prodeck API and created a CSV file from the JSON returned:  
<https://db.ygoprodeck.com/api/v7/cardinfo.php> . I did not use a real-time connection because it is disallowed by API and the problem did not specify it had to be real-time. Run **main.py** in **Assignment\_03/src**
- 2) Graph results are in **Assignment\_04/results**. A graph is saved for each part of question 2.
